GRINNELL G-FIRE One-Bolt Coupling

Single-bolt design means no alternate tightening required

Low-profile spine allows installation of coupling in tighter spaces

Pre-lubricated gasket with a center-stop allows for quick and easy positioning on the pipe

Pre-assembled with no loose parts for fast and easy push-on installation

Arriving pre-assembled and pre-lubricated, the GRINNELL G-Fire One-Bolt Coupling is ready to install right out of the box. The center-stop gasket ensures proper positioning on the pipe and enables easy push-on installation in both horizontal and vertical applications. Its unique, single-bolt design eliminates alternate tightening, which makes joining grooved pipe faster and easier than ever before.

The One-Bolt Coupling is UL, ULc and FM Approved, with a pressure rating of up to 365psi. It is available in sizes 2-inch to 8-inch, in both painted and galvanized.
