ZETTLER
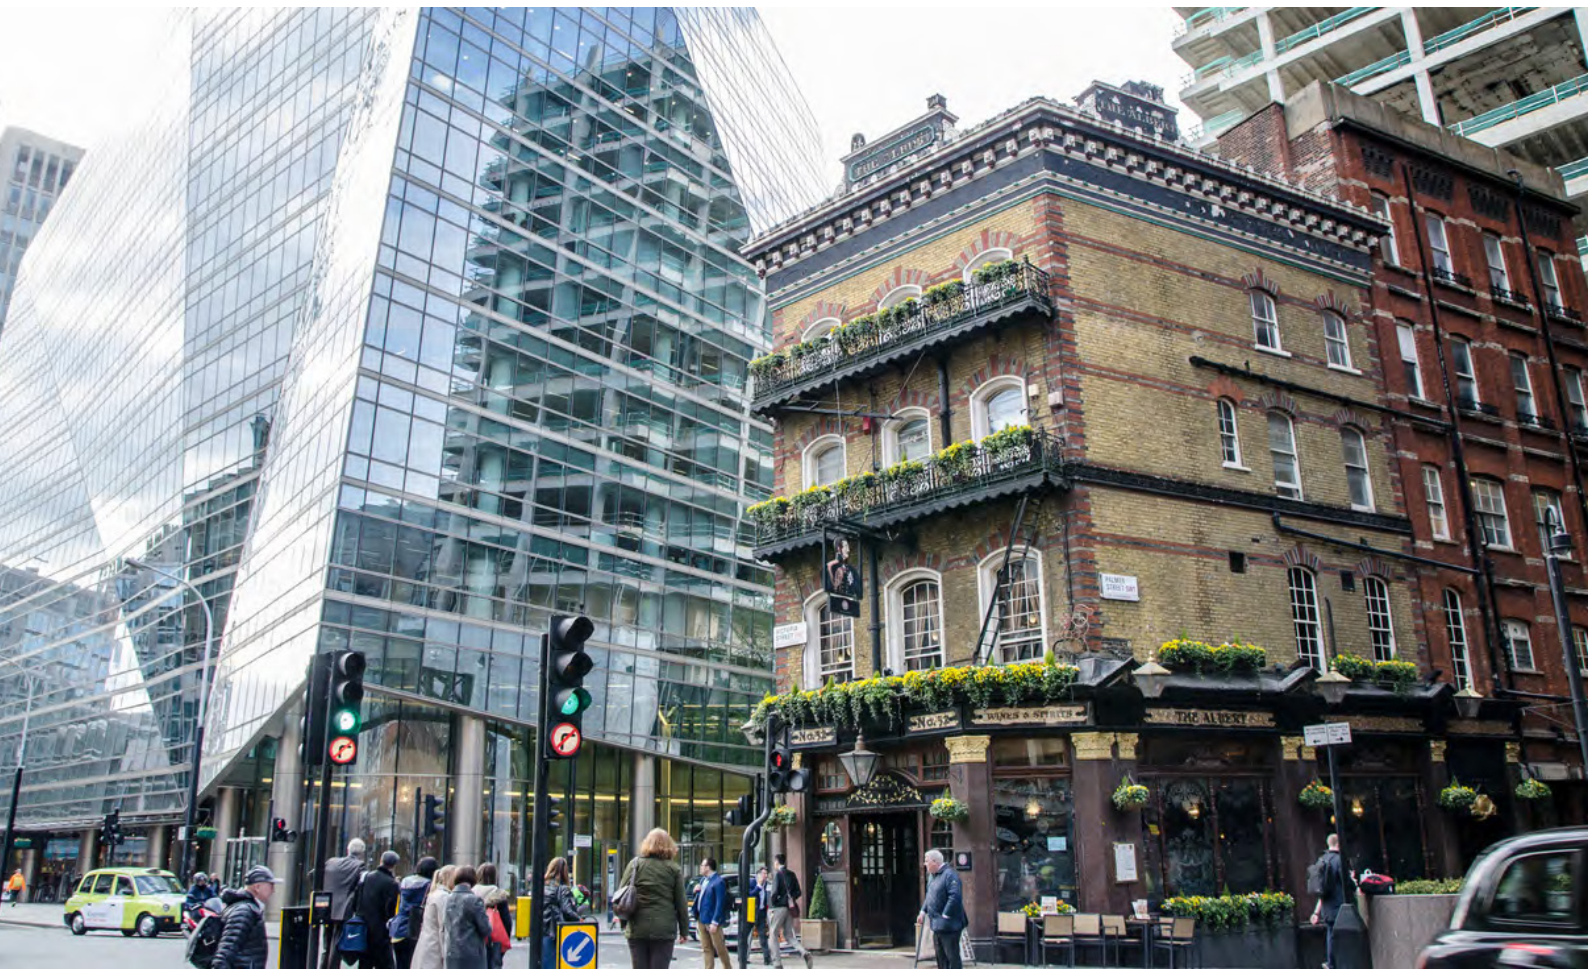

Zettler Connected Fire Services – Real-time information anytime, anywhere

The power behind **your mission**

Johnson Controls

Maximize operational efficiency and enhance protection with SafeLINC

In life safety, visibility into real-time information is essential for protecting people and property – and making timely, accurate decisions.

SafeLINC from Zettler enables you to access real-time data from your fire alarm panels through a secure cloud platform, and the SafeLINC web interface and mobile app allow you to monitor your system from anywhere, at any time.

The SafeLINC cloud platform receives, stores, analyzes and delivers information and reports from your fire alarm panels that fuel intelligence for informed decision-making and immediate action by approved personnel.

With SafeLINC from Zettler, you are always connected and have the information you need to handle emergencies and plan maintenance for maximized efficiency and enhanced life safety protection

Stay connected with SafeLINC

Convenient monitoring and management of systems
SafeLINC connects you with fire panels in each building, campus or multiple campuses, giving you total visibility at your fingertips.

Enhanced service efficiency and quality
Because you can see what's happening with each fire panel and view logs, you can plan maintenance to minimize disruption and maximize efficiency. Remote access also allows remote engineers to help on-site technicians correct problems.

Better safety and emergency response
Email and push notifications of events through the mobile app get critical information to you wherever you are, enabling a faster, more appropriate response.

Easy access to information and reports
Connect to your fire panels via the web user interface or mobile app to see exactly what's happening and review system logs.

Streamlined inspections and commissioning
In addition to planning maintenance and aiding troubleshooting of systems, the easy-to-use desktop and mobile apps allow you to monitor a variety of tasks while away from the fire panel, helping to streamline inspections and commissioning.

A comprehensive information solution

SafeLINC is a real-time life safety information solution comprised of:

- **A gateway** installed in a fire alarm system or near a fire panel that transmits data via your building internet using an optional cellular module

- **An accessible, secure, managed cloud database** that receives and hosts the data

- **A web-based dashboard** that receives and displays real-time events and provides the capability to search historical events and view reports and logs

- **A mobile app**, available for both iOS and Android operating systems, that keeps you in constant contact with your life safety systems wherever you go

Ensure stronger, more flexible connectivity

SafeLINC brings new versatility and effectiveness to connectivity. The connected services gateway protects you with a backup cellular network that takes over should your LAN connection go down for any reason, keeping your connection always intact.

- With IP connectivity, alarm transmission efficiency is improved, accelerating response in an emergency.

- SafeLINC over IP delivers constant connection supervision through two-way encrypted communication every 90 seconds. This is vastly superior to telephone lines, which only supervise once every 24 hours – meaning your fire panel could be out of reach for up to a day before the problem is spotted.

Safeguard your investment

SafeLINC is available for use with Zettler PROFILE Flexible, PROFILE, PROFILE Lite, MZX (CPU800) and MZX (CPU801) fire panels and offers backward compatibility to safeguard your investment in legacy systems.

Innovative solutions for greater visibility and protection

With the addition of SafeLINC, Zettler continues to build on a rich tradition of innovation with advanced products and technologies that ease system management while better protecting people and buildings.

About Johnson Controls Building Technologies and Solutions

At Johnson Controls, we transform the environments where people live, work, learn and play. From optimizing building performance to improving safety and enhancing comfort, we drive the outcomes that matter most. We deliver our promise in industries such as healthcare, education, data centers and manufacturing. With a global team of 100,000 experts in more than 150 countries and over 135 years of innovation, we are the power behind our customers' mission. Our leading portfolio of building technology and solutions includes some of the most trusted names in the industry, such as Tyco®, YORK®, Metasys®, Ruskin®, Titus®, Frick®, Penn®, Sabroe®, Simplex®, Ansul® and Grinnell®.
